Nathan Treadwell

N1236 Bobwhite Drive

Dear Village Planning and Zoning Commissioners,

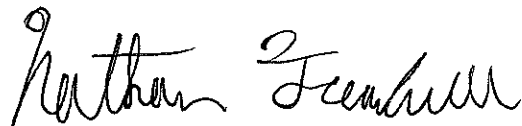

I would like to formally state my support for the proposed subdivision plat. This development will bring valuable new housing options to the Village and finally complete the long-anticipated connection of Design Drive. It will also create a strong link between Savannah Heights, Quail Run, Hidden Estates, and the Summer Breeze subdivisions. These connections were always part of the original plan, as evidenced by the existing stub streets designed for future connectivity.

One item I'd like clarified is the status of the trail connection that currently ends at the east side of Design Drive. Ensuring continuity of that trail should be a priority as part of this development.

While I recognize that some nearby residents may express opposition, it's important to consider the broader benefits. This subdivision will improve interconnectivity within the community and provide significant financial advantages for both the Village and our utilities.

Concerns about the multifamily portion of the development should be viewed in context—the rental rates for these units are expected to exceed the mortgage payments of many existing homes. I encourage the Planning Commission to remain committed to this project and not be swayed by a vocal minority resistant to change.

Thank You,

Mark

I received the conceptual preliminary plat for the development on School Road.
My lot on W6676 Golden Autumn Place in Greenville borders the proposed new development.
My northern lot line is facing 4 different lots in the new development. When the Summer Breeze development was approved we were asked to match the lot lines as close as possible to the adjoining developments.

This proposed development does not come even close to that requirement if I am now facing 4 houses against my lot.

The Town Administrator at the time told me that the lots to the North of my property would be designated as at town park.

This development does not line up with previous plans and what we told by the Town.

We got your letter from the town of Greenville on proposed plan for development behind us with hearing for comments on July 28. We will still be out of town and unable to attend. Attached are our thoughts and concerns:

1. This is a concept. What is actual plan? When will comments on it occur?
2. What are sizes of lots? Numbers too small to read.
3. Are there restrictions on minimum size house?
4. Will there be any convents?
5. Do we know impact on wildlife?
6. What is the timetable for start and completion?
7. Are there requirements for total completion?
8. Will same setback rules apply?
9. Will drainage plans be altered?
10. I don't see wetlands noted. Is there a plan?
11. Has due diligence been planned to ensure developer has means (financial and otherwise) to complete project? Partial completion will be a nuisance and eyesore
12. Does moving ahead with this project reduce our property taxes or increase them?
13. Has any work been done assessing impact of property value of existing homes?

Thanks
