

PLANNING COMMISSION MEETING MINUTES

DATE: Monday, December 8, 2025
TIME: 5:00 PM
LOCATION: Greenville Village Hall, W6860 Parkview Drive, Greenville, WI 54942

OPENING

1) **CALL TO ORDER/ROLL CALL**

The meeting was called to order at 5:05 PM.

PRESENT: Jack Anderson, Leanne Meidam-Wincentsen, Michael Simonds, Jay Plemon, Daniel Dibbs

EXCUSED: Brittany Helf, Fred Rose

2) **PUBLIC HEARINGS**

3) **PUBLIC COMMENT FORUM**

The individuals listed spoke on the concept plans, Items 6a and 6b. Concerns included: traffic, drainage, infrastructure, safety, bike lanes, school capacity, high density/multi-family units and park and recreation opportunities.

Bob Ebben, N2743 Manly Road; on behalf of Ebben family

Aaron Sauer, W7273 Midnight Way; Attachment

Gary Ziegler, N1367 Julius Drive

Kim Johnson, W7029 Bluebluff Way and N2006 Greenville Drive

John Julius, W7070 Wisconsin Avenue

Don Hayes, N1411 Westhaven Drive

Kevin Reis, W7280 Hillview Road

Bruce Bennett, N2192 Bennet Circle

James Buman, W6954 Hillview Road

Dennis Reis, W7246 Hillview Road

Tom Krueger, W7367 Westhaven Drive

Gary Bekx, N1670 Prairie View Drive

Jean Goffard N853 Julius Drive/Linda Kester, (protem), N2038 Julius Drive

Motion by Jack Anderson, second by Jay Plemon close the Public Comment Forum.
Motion carried 5 - 0/ None.

BUSINESS AGENDA

4) CONSENT AGENDA

4.a Permit Report

Sub&CSM_Nov25.pdf

4.b Approval of November 10, 2025 Meeting Minutes.

20251110_PCminutes.pdf

Motion by Leanne Meidam-Wincentsen, second by Daniel Dibbs to approve the Consent Agenda. Motion carried 5 - 0/ None.

5) UNFINISHED BUSINESS FOR DISCUSSION & POSSIBLE ACTION

6) NEW BUSINESS FOR DISCUSSION & POSSIBLE ACTION

6.a Discuss a Concept Plan for lands near Hillview Road/Julius Drive, Parcels #111015600, #111015400, & #111026800.

Memo - CP_015600.pdf

Aerial Map.pdf

Concept Plan.pdf

Sub Area G - FINAL PLAN.pdf

Discussion about the concept plan included considerations for: stormwater runoff, wooded areas, number of multi-family units, effect on schools, public safety, water/sewer plan, timing due to infrastructure needs, cul-de-sac unnecessary, no park/recreation land or trails. The commission is not in favor of the concept as presented. Suggested changes would include the following: downstream stormwater needs to be addressed prior to development, lots around woodland must be larger (1-ac+), number of MF units is concerning for schools and development should be done in phases, EMS fire & sheriff review, confirm infrastructure needs of water & sanitary, remove cul-de-sac, too much MF for a buffer, look to reduce total MF units to appropriate buffer, provide park and recreation area, provide trails.

6.b Discuss a Concept Plan for lands near School Road/Julius Drive, Parcels #111063600 & #111063502.

Memo - CP_063600.pdf

Aerial Map.pdf

ConceptPlan_063600.pdf

Resident_PetitionSurvey.pdf

Discussion about the concept plan included: bike trails, traffic studies, urbanization of roads, preference for single family, lot sizes, transitional lots, park

areas, water concerns, construction traffic, cul-de-sacs and traffic patterns. Suggested changes would include the following: trails through subdivision with a straighter path to Julius Dr/School Rd; traffic study on Julius Dr & School Rd and intersection should be completed to look at turn lanes; possibly urbanize School Rd; eliminate officially mapped road; no MF development, only SF; SF lots to be 1/2-ac min with transitional lots near wooded or environmental features; limit truck traffic during school pick up/drop off times; parkland on wet areas no appropriate; elevation of land for home building and drainage plan should be looked at; trails and parks should be provided; no cul de sacs; more typical street patterns; all planning commission members mentioned no MF.

6.c Discuss/Consider/Act on Res 28-25 Approving Public Improvement/Engineering Plans for W7061 CTH JJ, Parcels 111009201.

Memo.pdf

Aerial Map.pdf

Eng Plans_11.4.25-stamped.pdf

Resolution No. 28-25 Engineering Plan CSM - Griesbach 111009201.pdf

Motion by Michael Simonds, second by Daniel Dibbs to approve Res 28-25 Approving Public Improvement/Engineering Plans for W7061 CTH JJ, Parcels 111009201 with the following conditions:

1. Public Improvement/Engineering Plans, including stormwater management, must be submitted prior to CSM signatures.
2. There is a special assessment for stormwater. All special assessments and taxes must be paid prior to CSM signatures, as required by state statute.
3. A fee in lieu of parkland dedication is recommended and can be incorporated into the development agreement.
4. Street tree fee will be required. This should be incorporated into the development agreement for the street construction.
5. Streetlight at end of cul de sac will be required.
6. A development agreement should be approved as a condition of CSM approval to ensure road construction meets subdivision improvement policy. Motion carried 5 - 0/ None.

6.d Discuss/Consider/Act on Res 37-25 Approving a Certified Survey Map (CSM) for W7061 CTH JJ, Parcels 111009201 & 111008909.

Memo.pdf

Aerial Map.pdf

CSM #2_4-lots_10.29.25.pdf

Resolution No. 37-25 CSMs - Griesbach 111009201 & 111008909.pdf

Motion by Leanne Meidam-Wincentsen, second by Michael Simonds approve Res 37-25 Approving a Certified Survey Map (CSM) for W7061 CTH JJ, Parcels 111009201 & 111008909 with the following conditions:

1. Public Improvement/Engineering Plans, including stormwater management, must be submitted prior to CSM signatures.

2. There is a special assessment for stormwater. All special assessments and taxes must be paid prior to CSM signatures, as required by state statute.
3. A fee in lieu of parkland dedication is recommended and can be incorporated into the development agreement.
4. Street tree fee will be required. This should be incorporated into the development agreement for the street construction.
5. Streetlight at end of cul de sac will be required.
6. A development agreement should be approved as a condition of CSM approval to ensure road construction meets subdivision improvement policy. Motion carried 5 - 0/ None.

6.e Discuss/Consider/Act on Resolution 54-25 Approving a Final Plat for Encore Subdivision, Parcels #111040507 & #111040400.

Memo - Final Plat - Encore.pdf

Final Plat_Encore.pdf

Resolution No. 54-25 Final Plat Encore.pdf

Motion by Jay Plemon, second by Leanne Meidam-Wincentsen to approve Resolution 54-25 Approving a Final Plat for Encore Subdivision, Parcels #111040507 & #111040400 with the following conditions:

1. Development Agreement, in accordance with Sec. 270-13 B, must be executed prior to Village signing Final Plat.
2. A copy of any restrictive covenants must be provided to the Village, in accordance to Sec. 270-36 C(1). Motion carried 5 - 0/ None.

6.f Discuss/Consider/Act on Appleton International Airport Request to Amend Sewer Service Area Boundary.

Memo_SSA Amendment.pdf

Narrative.pdf

John Julius, W7070 Wisconsin Avenue; development in the area.

Motion by Jack Anderson, second by Jay Plemon to approve Appleton International Airport Request to Amend Sewer Service Area Boundary. Motion carried 5 - 0/ None.

CLOSING

7) ANNOUNCEMENTS & FUTURE MEETING DATES

January 12, 2026

8) ADJOURNMENT

Motion by Michael Simonds, second by Daniel Dibbs to adjourn at 6:23 PM. Motion carried 5 - 0/ None.

Wendy Helgeson, Village Clerk
Approved:

Community Concerns Regarding Proposed Concept Plan – near School Road and Julius Drive

Good evening,

I'm speaking on behalf of about 45 residents in our neighborhood, which is located on the northern border of the proposed development being considered on School Road and Julius Drive. Our neighborhood is comprised entirely of single-family homes on lots of at least 0.5 acres, and we believe the existing infrastructure was never designed to support high-density subdivisions and multi-family residential units. While growth is important, we believe this location is not an appropriate or safe place for the submitted concept plan.

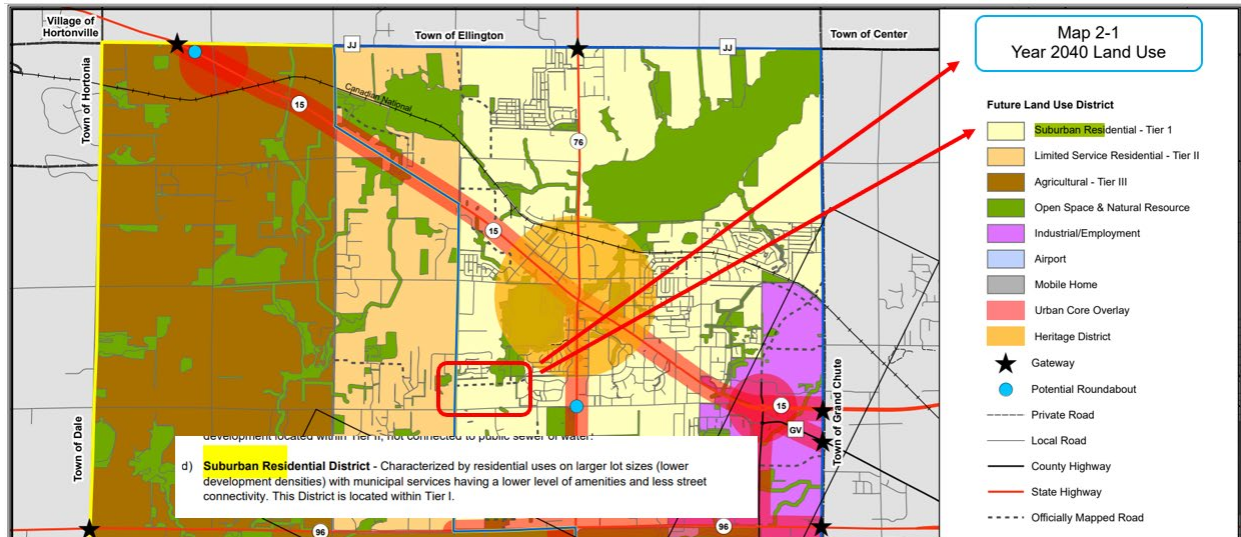

We are asking for this proposal to be significantly modified from its current design to preserve our rural character, avoid large apartment-style density at this location, and fully address traffic and safety impacts on School Road and Julius Drive.

Below are the primary concerns we ask the Village Planning Commission and Village Board to consider:

1. Maintain Rural Character

This neighborhood is part of Greenville's rural edge, where people choose to live for open space, quiet, and low-density homes. Allowing a large, urban-style project here would permanently change that character for everyone who already lives along School Road and Julius Drive.

Greenville's own 2040 Comprehensive Plan, stemming from a 2018 study, states its purpose is to guide land use decisions "while ensuring future sustainability of local natural resources and the agricultural heritage of Greenville." In that adopted plan, this corridor is designated for "Suburban Residential – Tier 1", not high-density multi-family use.

The Village's own Comprehensive Plan and Land Use Map recognize this area as part of Greenville's rural, low-density fabric, not as an urban, high-density corridor. When you override that map for an isolated project, it undermines years of planning work and public input that shaped where development belongs. Residents who relied on those plans and maps when they bought and improved their homes, lose trust in the planning and zoning process.

We are asking you to uphold your Comprehensive Plan and Future Land Use Map by keeping this corridor rural and low-density. Directing higher-density growth to areas already planned "Urban Core" along state highways 15, 76, and 96.

2. Current Roadway Infrastructure Cannot Support the Increased Traffic

The roads surrounding this proposed development — particularly School Road and Julius Drive — are already operating at or near capacity. These roads were originally designed for low-density residential neighborhoods, not multi-story apartments or large-scale townhome complexes. Without serious safety upgrades, these roads will be more dangerous for children and more frustrating for existing residents. Adding hundreds of additional daily vehicle trips will worsen:

- Congestion
- Backups during peak hours at the adjacent school
- Emergency vehicle response times
- Risk of collisions

The state has already committed a multi-million dollar project to build a roundabout at the WIS 76 and School Road to address known safety and traffic issues at that intersection.

The state would not have invested in that major safety project if this corridor didn't already have significant traffic and safety concerns. The section of School Road in this area is essentially two travel lanes with very narrow, deep drop-offs or gravel shoulders, and the Village is already focusing on connecting trails for our community to better accommodate pedestrians and bicyclists. A narrow two-lane road with minimal shoulders was never designed for heavy turning movements in and out of large apartment and townhome complexes. Adding hundreds of new daily trips and turning movements on this busy school and church corridor without full traffic and safety analysis risks creating more safety concerns and undermines past and future taxpayer investment.

These roads may not be able to be widened without significant disruption to existing homes, residents, and Immanuel church, school, and cemetery. Before any approval, we request an independent, traffic and safety study covering School Road and Julius Drive intersection, and the developer should be required to fund the turn lanes, access changes, and safety measures that the study identifies. Protecting children and families who already rely on these roads must come before adding more traffic to them.

3. Severe Safety Risks for Church, School, and Children

Immanuel Lutheran Church has approximately 2,500 community members and holds multiple services on its campus directly across from this proposed development. Immanuel Lutheran School, on the same campus, serves about 375 students in grades Pre-K through 8th. This proposed development sits directly in the traffic flow of the church, daycare, and school that already struggle with high-volume traffic during drop-off and pickup times, as well as after-school activities.

Safety risks that will be exacerbated include:

- Children crossing roads
- Vehicle line back-ups dangerously near entrances
- Increased likelihood of pedestrian incidents
- Driver frustration and hurried maneuvers during peak times

We already see safety concerns daily — adding hundreds of vehicles will significantly increase the danger to schoolchildren. We're asking you to say no to high-density lots, apartments and townhomes at this location and instead require single-family, rural-friendly designs. That still allow growth, but it keeps this corridor safe and workable for the church, school, and existing residents.

4. Field of Dreams, Julius Drive, and School Road Cannot Handle a Major Influx

With proposed Field of Dreams, Julius Drive, and School Road all funneling into this same corridor, the system is already stressed. Any major housing density increase would create a bottleneck the infrastructure simply cannot absorb.

This is not a matter of inconvenience — it is a public safety issue.

5. Better and More Appropriate Locations Exist

If multi-family expansion is part of the village's development strategy, there are significantly better locations, such as Highways 15, 76, and 96 corridors. These areas:

- Already have commercial-grade road infrastructure
- Provide direct access to major arteries
- Can support higher traffic volumes
- Align more naturally with higher-density zoning
- Avoid creating safety risks around schools, churches, and residential neighborhoods

Smart growth is about placing development where the infrastructure can support it — this is not that location.

6. Long-Term Liability and Risk for the Village

If the Board approves a development in an unsuitable location, it assumes:

- Liability for foreseeable safety risks to children and residents
- Potential cost for future road expansion and additional infrastructure.
- Community dissatisfaction
- The burden of addressing school and church traffic issues that will worsen dramatically

Preventing a known risk is far more responsible than trying to fix it later.

7. Other Additional Factors/Concerns

Our neighborhood community also wanted to include a couple other factors and concerns related to the property and proposal. Many residents have lived here for the last 13 years

and have photograph documentation of the field flooding each spring and fall near the existing wetland property within our neighborhood. The current property owners have repeatedly tried to implement various mitigation strategies throughout those years in order to maintain usable farmland. Some of our residents were informed that the field may contain drain tile in portions of the property. What impact does existing or old drain tile have with this proposal? We request that the Village take consideration of this wetland/flooding into the proposal with all proper DNR and engineering requirements for the development.

One last concern, we request that the Village require transitional lots with existing properties on Midnight Way.

Closing

In closing, we understand the importance of growth and housing availability. We are not opposed to development — we are opposed to placing the wrong type of development in the wrong location. For the safety of our children, the integrity of our neighborhood, and the sustainability of our infrastructure, we respectfully ask the Village Board to deny this concept plan.

We strongly urge the Village Board to consider more appropriate locations for multi-family development such as the Hwy 15/76/96 corridor that can properly support future growth without jeopardizing public safety and losing the green in Greenville.

Thank you for your time and consideration.

Subject: Devel Engineering Proposal Julius Drive

We are against the proposal from Devel Engineering on the Julius Drive and Hillview subdivision. Devel has not changed the density of homes or improved the problem of water runoff for the village of Greenville with their new plan. Quality has not been addressed. Are the town houses and duplexes rentals? Rentals do not improve the stability of the community. Please do not approve this subdivision. Keep agriculture land in production in Greenville.

Richard & Linda Kester

Subject: Concept plans and tonight's meeting

Hi Mark,

I was hoping to make it to the meeting tonight but I am unable to do so. I'm sorry for the lengthy email. I'm passionate about not turning our town into a big city and driving out wildlife and causing pollution. I wish I could participate in some of the committees because of how interested I am in the decisions going on about land in Greenville, but I'm too much of an introvert with social anxiety and I feel inadequate of knowledge. And I certainly don't want to speak in front of others at a meeting. Thank you for your time in reading and considering my email.

I'm hearing about these concept plans around Greenville and very disturbed at how little we know about this unless we hear from others. Is there some other way to find information or to make our voices heard? Especially when it comes to multi family homes that bring in an even higher population taking up space. And higher population density always brings in more crime.

We definitely are not keeping the Green in Greenville. Instead we are adding pollution to the environment and taking away spaces for animals. I understand the need for growth but it should be done more responsibly. I am also disappointed at how much my taxes go up every year with no extra services when I thought more tax revenue from more houses should lower my taxes.

This community has had so much building going on and I'm struggling with wrapping my mind around the decisions that are made to allow so many homes in small spaces. I do not understand why we are creating neighborhoods with such small yards. I don't know the process of the village accepting any building proposals but I hope those that decide consider the location of the type of dwelling and lot sizes. Would the village seriously consider apartments at the corner of Julius and School Rd? That's a terrible place for apartments. Keep them by hwy 15 or East of 76 if the village feels the need for apartments. They don't belong further into the country.

And for goodness sake look into the least disturbing type of street lights! Good God the light pollution is insane. I feel like I'm in the inner city from the light coming from the newer neighborhood across from the Y and I live West of Julius. All this light pollution is insane without regard to how it affects wildlife. At least choose the color differently and dim them down and spread them out. Consult wildlife experts in making decisions that affect wildlife. I feel bad when the birds are trying to migrate. Or the owls and bats that come out at night.

I've always loved animals but I haven't really thought much about what affects them and what we can do to help them until in the last decade. We built on a one acre property a decade ago that was once farmland. The biggest decision was I couldn't stand having a yard that was only a third of an acre. It made me very agitated being that close to my neighbors. So we moved from one part of Greenville to another part of Greenville. Building on land with nothing on it is so boring. I desire mature trees now but will never truly have them here because it takes so many years to grow beautiful trees. But we started with trying to plant some trees and half of them died. We planted more and half those died. It's been an expensive endeavor just to get trees in our yard. And let me tell you, wow, I cannot believe the difference in the amount of birds we see in all seasons the more we add to our yard. Blue jays and cardinals have increased. It's fun watching all the birds fly between yards and stopping at all the trees. And we don't even have super mature trees. They even stop at the brand new trees. Although we did spade in a couple trees to start with a couple larger ones. Even the bushes in the way back of our lot are used as safe haven for birds and bunnies.

We also have a very small perennial garden near the house. I've had my little perennial garden for five years and I barely have to weed or mulch it because the ground cover helps it and the perennials have filled in the space. Now for the first winter we see multiple times a day a flock of over a dozen juncos that partake on the seeds of the perennials. I don't know where they came from because we didn't see juncos before. I counted 15 the other day.

I say this because I wish our village would focus more on protecting the wildlife. Nature gives us higher frequencies which are good for our health. We need more trees and bushes and flowers and wildlife for our health. Trees help cool the environment, cleanse the air, provide shelter and food for birds, bring rain. When I went to Israel years ago and learned that they changed their environment by planting trees I was absolutely amazed. They went from desert to lush green in those areas. Planting trees brought the rain.

So there's a few things I'd dream of seeing if building would go on. Larger yards most at least an acre, more native trees planted and not just maple trees, more cognizant street lighting plans, and more insight on location of multi family dwellings to not bring so much population and pollution to the country areas and ruining wildlife.

Thanks,
Jennifer
