Subject: Protecting Our Neighborhood: Concerns About New Development

Dear Mark Mommerts,

I am writing to express my strong opposition to the proposed apartment complex and townhome development planned for the corner of School and Julius. While I understand the need for thoughtful growth within our community, this particular project raises several concerns that I believe would negatively impact our neighborhood and overall quality of life.

First, the increased density would place additional strain on local infrastructure. School and Julius are already busy during peak hours, and adding hundreds of new residents would significantly worsen traffic congestion and safety risks especially for children and pedestrians who frequently use these routes.

Additionally, the proposed complex does not align with the existing character of the neighborhood. Our area is made up primarily of single-family homes and open spaces, and introducing high-density housing would alter the community feel that so many of us value.

I respectfully urge the Village Board to reconsider this project and explore alternative solutions that better preserve the character, safety, and long-term sustainability of our community. Growth is important, but it should be responsible, balanced, and in harmony with the needs of current residents.

Thank you for your time, consideration, and dedication to our village. I appreciate your attention to these concerns.

Sincerely,
Mathieu Labs

Subject: Objections to plans for multifamily dwellings, small lot sizes

Hello,

I am writing to express my concerns and objection with the proposed projects to build multifamily housing on the corner of Julius and School Road, as well on north Julius, and frankly, any area west of hwy 76 in the village. I also object to any new neighborhoods that are proposed with lots less than 0.5 acre.

Currently this area is growing rapidly, with excessive traffic, congestion, and noise pollution that is ruining what made Greenville a standout, and great community to live.

The increase in traffic in the past few years has lead to safety issues for residents, need for road improvements, increased noise pollution, and recreational activities for established residents less safe, and at peak times, no longer a reasonable option on Julius and School roads.

We moved here, like so many of our neighbors and friends, to escape the congested neighborhoods of our adjacent cities. We were drawn to quiet and spacious neighborhoods that were safe and with a rural feel. We hope that Greenville will continue to standout as a unique and coveted area to live, rather than just another cookie cutter crowed urban development.

Lastly, I would also like to have noted objections for any further discussions or plans for park/splash pad development on the land at Julius and Wisconsin, for similar reasons as noted above.

Thank you for your time and consideration,

Kathleen Sheridan
