Wendy Helgeson, Village Clerk
Approved:

To: Greenville President, Trustees and Administrators

From: Land Stewardship Committee
Larry Bentle, Chairperson

Date: 23 September 2025

Subj: 2026 Budget Request for \$10,000, Land Stewardship Committee

Dear Mr. President and Trustees,

First of all, the Land Stewardship Committee (LSC) wishes to sincerely thank the Village Board for approving the ordinance on September 8, 2025, that made our committee an official entity of Village government. This is indeed a proud time for the Committee as it launches into our first year in that capacity and continues to create initiatives to preserve significant tracts of farmland within our community before no farmland remains available to do so.

More than two decades ago Town leadership began to implement key initiatives to preserve farmland within our community's boundaries. This was part of an overall plan to concentrate residential and commercial development in specified districts of the Town and set aside designated areas of Greenville for agriculture. The vision was to sustain agriculture as a key part of our heritage and, what is of equal importance, to provide community residents and visitors who follow us with priceless green agricultural space as was laid out in our prior Town leader's Greenville Greenbelt Plan.

Today, agriculture preservation zoning maps now clearly define the intentions of these planning efforts. In addition, Purchase of Development Rights (PDR) initiatives are now under way. Three farm families are engaged in the final phases of drafting agricultural easements with the American Farmland Trust (AFT) and Natural Resources Conservation Service (NRCS) to receive a matching grant by donating a total of nearly \$1 million in land value to establish permanent protection of over 300 acres of farmland from development within Greenville's designated Greenbelt. The AFT will administer the program over future years for easement compliance. This is a milestone development towards "Keeping the Green in Greenville." This will stand as a solid example to our residents of how future programs, with their help and involvement, can set Greenville apart from other communities both near and far that are allowing unrestricted residential and commercial development within their boundaries with little concern for what the final, irreversible result will be. We pledge to educate our residents on a solid PDR alternative of which they can be a part of to make it happen.

Our Request.

At this time, we are actively engaged in efforts to create promotional electronic media that will explain and advocate the use of PDR to Greenville residents at various venues. To continue this endeavor and foster related activities, ***the Land Stewardship Committee respectfully petitions the Village Board to grant funding in their 2026 municipal budget in the amount of \$10,000 to support the Committee's ongoing efforts during the upcoming fiscal year.*** This funding will advance our efforts to effectively communicate to our residents the benefits of land preservation and the means to make it happen.
